

New hospital true community 'gem'

To the editor,

We in Murfreesboro have a real gem among us. Recently, my friend and I were privileged to take a tour of the new hospital. From the moment we stepped into the beautiful reception room until we saw all the facility, I was in awe. The patient rooms are spacious and beautifully decorated. The tile floors, the carpet, the wonderful use of stone, and the large windows to give a lovely vista of Murfreesboro were just amazing.

Dr. Andy Brown was so gracious to give us this guided tour of our new hospital. He assured us that anyone interested in a tour can call his office to set up a time for this amazing experience. I can't believe that the design of the building is so great. They have utilized every inch and made it all beautiful. Thanks to all those involved in this huge endeavor. It is truly wonderful and we should all be thankful for such a wonderful health care facility.
